

CRJ-31 Adaptor

Plug-in Wire to RJ12 Output

frees your hand from traditional installation methods

Feature

- Mini in size
- Lockable Plug-in Pins design
- RJ12 output
- Reliable, easy, fast and free-error wiring

Introduction

CRJ-31 Adaptor is a new new generation connector designed by EASTRON. It is one part of Easy-click solution. The product allows you to easily make the plug-in wiring sensors with RJ12 output. It is widely used for connecting hard wiring sensor to electric meter with RJ12 socket.

General Specifications

Model	CRJ-31	
Weight	12.3g	
Output	Supports mV and mA output, e.g 100mV, 333mV and 100mA	
Output socket	RJ12	
Operating temperature	-25°C to 55°C	
Storage temperature	-40°C to 70°C	
Material	Self-extinguishing UL94V-0	
Female terminal model to match the Plug-in socket of the CRJ-31	HY-2Y: 2-PIN	HY-PT: 2-PIN
